

ACI Concrete Field Testing Certification

University Engineering Student Registration

The Arkansas Ready Mixed Concrete Association provides university engineering students the opportunity to take the ACI Concrete Field Testing Certification at a reduced rate. The actual costs of the books and exams are supplemented by donations from ARMCA members. Industry personnel pay \$450 - \$650 for this certification.

Due to the growing number of students utilizing this opportunity the students are now required to register and pay at the beginning of the semester. The registration fee is \$130 each.

1. Students should arrive prepared to complete each of the 7 performance exams.
2. Students should be dressed for working with concrete. Closed toe shoes, safety glasses, no loose fitting clothing which includes but is not limited to V-neck shirts, tank tops, baggy jeans, etc. Performance exams require bending and stooping.

I have read the above statements and would like to take the ACI Concrete Field Testing Certification at the student rate of \$130. Students may register online at www.concretearkansas.org to pay by credit card. Re-test fees are \$175.00 for written or performance.

ACI Concrete Field Testing Certification \$130.00 ___ Paid Online with Credit Card
 ___ Cash ___ Check

Student's Name: _____

Student's email address: _____

Student's signature: _____

Student's Address: _____

University attending: _____

Payment should be given to your professor/instructor who will mail to ARMCA or Register online at www.concretearkansas.org
